

PAPERS OF THE INSTITUTE FOR THERMAL SPRING RESEARCH OKAYAMA UNIVERSITY

No. 41

March, 1972

CONTENTS

ORIGINAL PAPERS	Page
Osamu MATSUBAYA: The effect of pH of water on the measurement of oxygen isotopic ratio by means of CO ₂ -H ₂ O isotopic exchange technique	1
Osamu MATSUBAYA: A subsequent report on the new McKinney type mass spectrometer in the Institute for Thermal Spring Research, Okayama University	3
Makoto WATANABE and Osamu MATSUBAYA: On the measurement of oxygen and carbon isotopic ratios of carbonates	9
Taeko INOUE and Hiroshi MORINAGA: On climatology in Misasa spa (third report)	13
Kazue TAKAHASHI: Studies on chrysotherapy in rheumatoid arthritis, III. Gold determination by the atomic absorption spectrophotometry	33
Michiaki KOTAKEMORI: Absorption of Medium-chain triglyceride (MCT) in isolated intestinal loops of dog and its effect upon the lipids of serum and adipose tissue	49
Yasuharu NOISHIKI, Michiaki KOTAKEMORI, Yoshiaki KOMOTO and Yasuhiro NAKAHARA: Report of a case of severe mechanical jaundice—Successfully treated by jejuno-hepatic ducts anastomoses	57
Yasuharu NOISHIKI, Yoshiaki KOMOTO and Yasuhiro NAKAHARA: Esophagus hiatal hernia with special reference to the early stage	63
