

SCIENTIFIC REPORTS OF THE FACULTY OF AGRICULTURE
OKAYAMA UNIVERSITY, JAPAN
Vol. 102, February 1, 2013

CONTENTS

Original paper

- Isolation and Identification of a Plant Growth-Promoting Fungus from an Agricultural Field in Okayama Prefecture
Yamagiwa, Y., Toyoda, K., Inagaki, Y., Ichinose, Y. and Shiraishi, T. 1
- A Volatile Substance, β -Caryophyllene, from *Talaromyces wortmannii* Promotes Growth and Tolerance to Diseases on Several Plants
Yamagiwa, Y., Toyoda, K., Inagaki, Y., Ichinose, Y.,
Hyakumachi, M. and Shiraishi, T. 7
- Effect of Supplied Amount and Strength of Nutrient Solution on Growth, Yield, and Fruit Quality of Strawberry 'Saga-honoka' Grown with Sufficiently Elevated CO₂
Inazumi, D., Yoshida, Y., Goto, T. and Murakami, K. 15
- Incidence of Blossom-end Rot in Relation to Water-soluble Ca Concentration in Tomato Fruits as Affected by Ca Nutrition under Root Restriction
Yoshida, Y., Shingai, A., Ooyama, M., Murakami, K. and Goto, T. 21
- Effect of Day Length, Supplemental Lighting Strength, Shading Period and Minimum Night Temperature on Occurrence of Abnormal Inflorescence in *Gypsophila paniculata* 'Altair'
Yamaguchi, N., Goto, T., Kobiki, K., Otani, S. and Yoshida, Y. 29
- Effect of Lighting Using Yellow LEDs Designed for Moth Control on Flowering Response of Chrysanthemum
Ishikura, S., Kajihara, S., Fukushima, K. and Goto, T. 35

Monograph

- Effects of Sex-steroid Hormones on Lymphocyte Genesis in the Central Lymphoid Organs of Chickens
Kondo, Y. 43

Research Report

- Development of New Irrigation System based on Water Relations Research for Citrus Fruit Production
Morinaga, K. 53
- Plasmodium Falciparum*-infected Erythrocytes Adhere to Class A Scavenger Receptor, SR-A
Hatabu, T. 63
