

SCIENTIFIC REPORTS OF THE FACULTY OF AGRICULTURE

OKAYAMA UNIVERSITY, JAPAN

Vol. 103, February 1, 2014

CONTENTS

Original paper

Changes in Glycinin-Digesting Protease Activity During Soybean Germination.	
Md. Akhtaruzzaman., Maeda, M., Kitagawa, K., Takagi, S. and Kimura, Y.	1
Characterization of L-Arginine Oxidase Made from L-Glutamate Oxidase	
Nakai, R., Fujino, S., Utsumi, T., Tamura, T., Kusakabe, H. and Inagaki, K.	5
Effects of potassium nutrition on fruit development and yield of substrate grown strawberry	
Yoshida, Y., Ohmori, T., Goto, T., Tanaka, Y. and Murakami, K.	11
Characterization of a novel retrotransposon <i>TriRe-1</i> using nullisomic-tetrasomic lines of hexaploid wheat	
Monden, Y., Takai, T., Tahara, M.	21

Research Report

Isolation and characterization of plant immune-priming chemicals	
Noutoshi, Y.	31
Research on capsiconinoid contents, nonpungent capsaicinoid analogues, in <i>Capsicum</i> cultivars	
Tanaka, Y.	37
