

SCIENTIFIC REPORTS OF THE FACULTY OF AGRICULTURE

OKAYAMA UNIVERSITY, JAPAN

Vol. 104, February 1, 2015

CONTENTS

Original paper

- Improvement of dye-mediated dehydrogenase activity of pyranose oxidase by site-directed mutagenesis
Araki, T., Nakatsuka, T., Tamura T. and Inagaki, K. 1
- Characterization of a putative chromosome segregation and condensation protein (ScpB) in an acidophilic iron-oxidizing bacterium *Acidithiobacillus ferrooxidans*
Kamimura, K., Nagata, N., Kikumoto, M., Sharmin, S., Wakai, S. and Kanao, T. 5
- Effects of different types of fertilizers and methods on dry matter production, yield and nitrogen use efficiency of rice cultivars under field conditions
Yabe, R., Nguyen, Q.C., Trinh, T.S. and Saitoh, K. 13

Review

- Why do rabbits ingest their feces ?
Sakaguchi, E. 23

Monograph

- Microbiological Research on the Traditional Alcoholic Fermented Milk "Airag" in Mongolia
Miyamoto, T. 35

Research Report

- Development of a new computer-assisted technigue for efficient usage of latent heat with computer system
Yasuba, K. 49
- Effect of fasting and re-feeding on aquaporin gene expression in liver and kidney of the chicken
Saito, N. 55
