

1 **Table 1** Summary of reported cases of plasma cell neoplasms with spontaneous regression

Case	Year	Age/Sex	Site of lesion	Immune dysregulation		Additional findings without biopsy	Time from diagnosis to SR (months)	Follow-up (months)	Outcome	Reference
				HIV	Non-HIV					
1	1988	80/Male	Left posterior chest wall	NA	Advanced age	Current infection–	2	NA	NA	12
2	2012	42/Male	Right nasal cavity	NA	No evidence	Current infection–	1	12	Alive, NED	13
3	2014	60/Female	Bone marrow	NA	No evidence	Current infection– Use of pamidronate	6	NA	Alive, NED	19
4	2023	76/Male	Left mandibular, bone marrow	–	Advanced age	Current infection–	6	29	Alive, NED	20
5	2023	83/Male	Left nasal cavity, right humerus, left ribs	–	Advanced age	Current infection– EBER-ISH+	6	12	Alive, NED	Present case

2 Abbreviations: EBER-ISH, Epstein–Barr virus encoded small RNA-*in situ* hybridization; HIV, human immunodeficiency virus; NA, not

3 available; NED, no evidence of disease; SR, spontaneous regression
