

Figure 1. Clinical and laboratory course of the case.

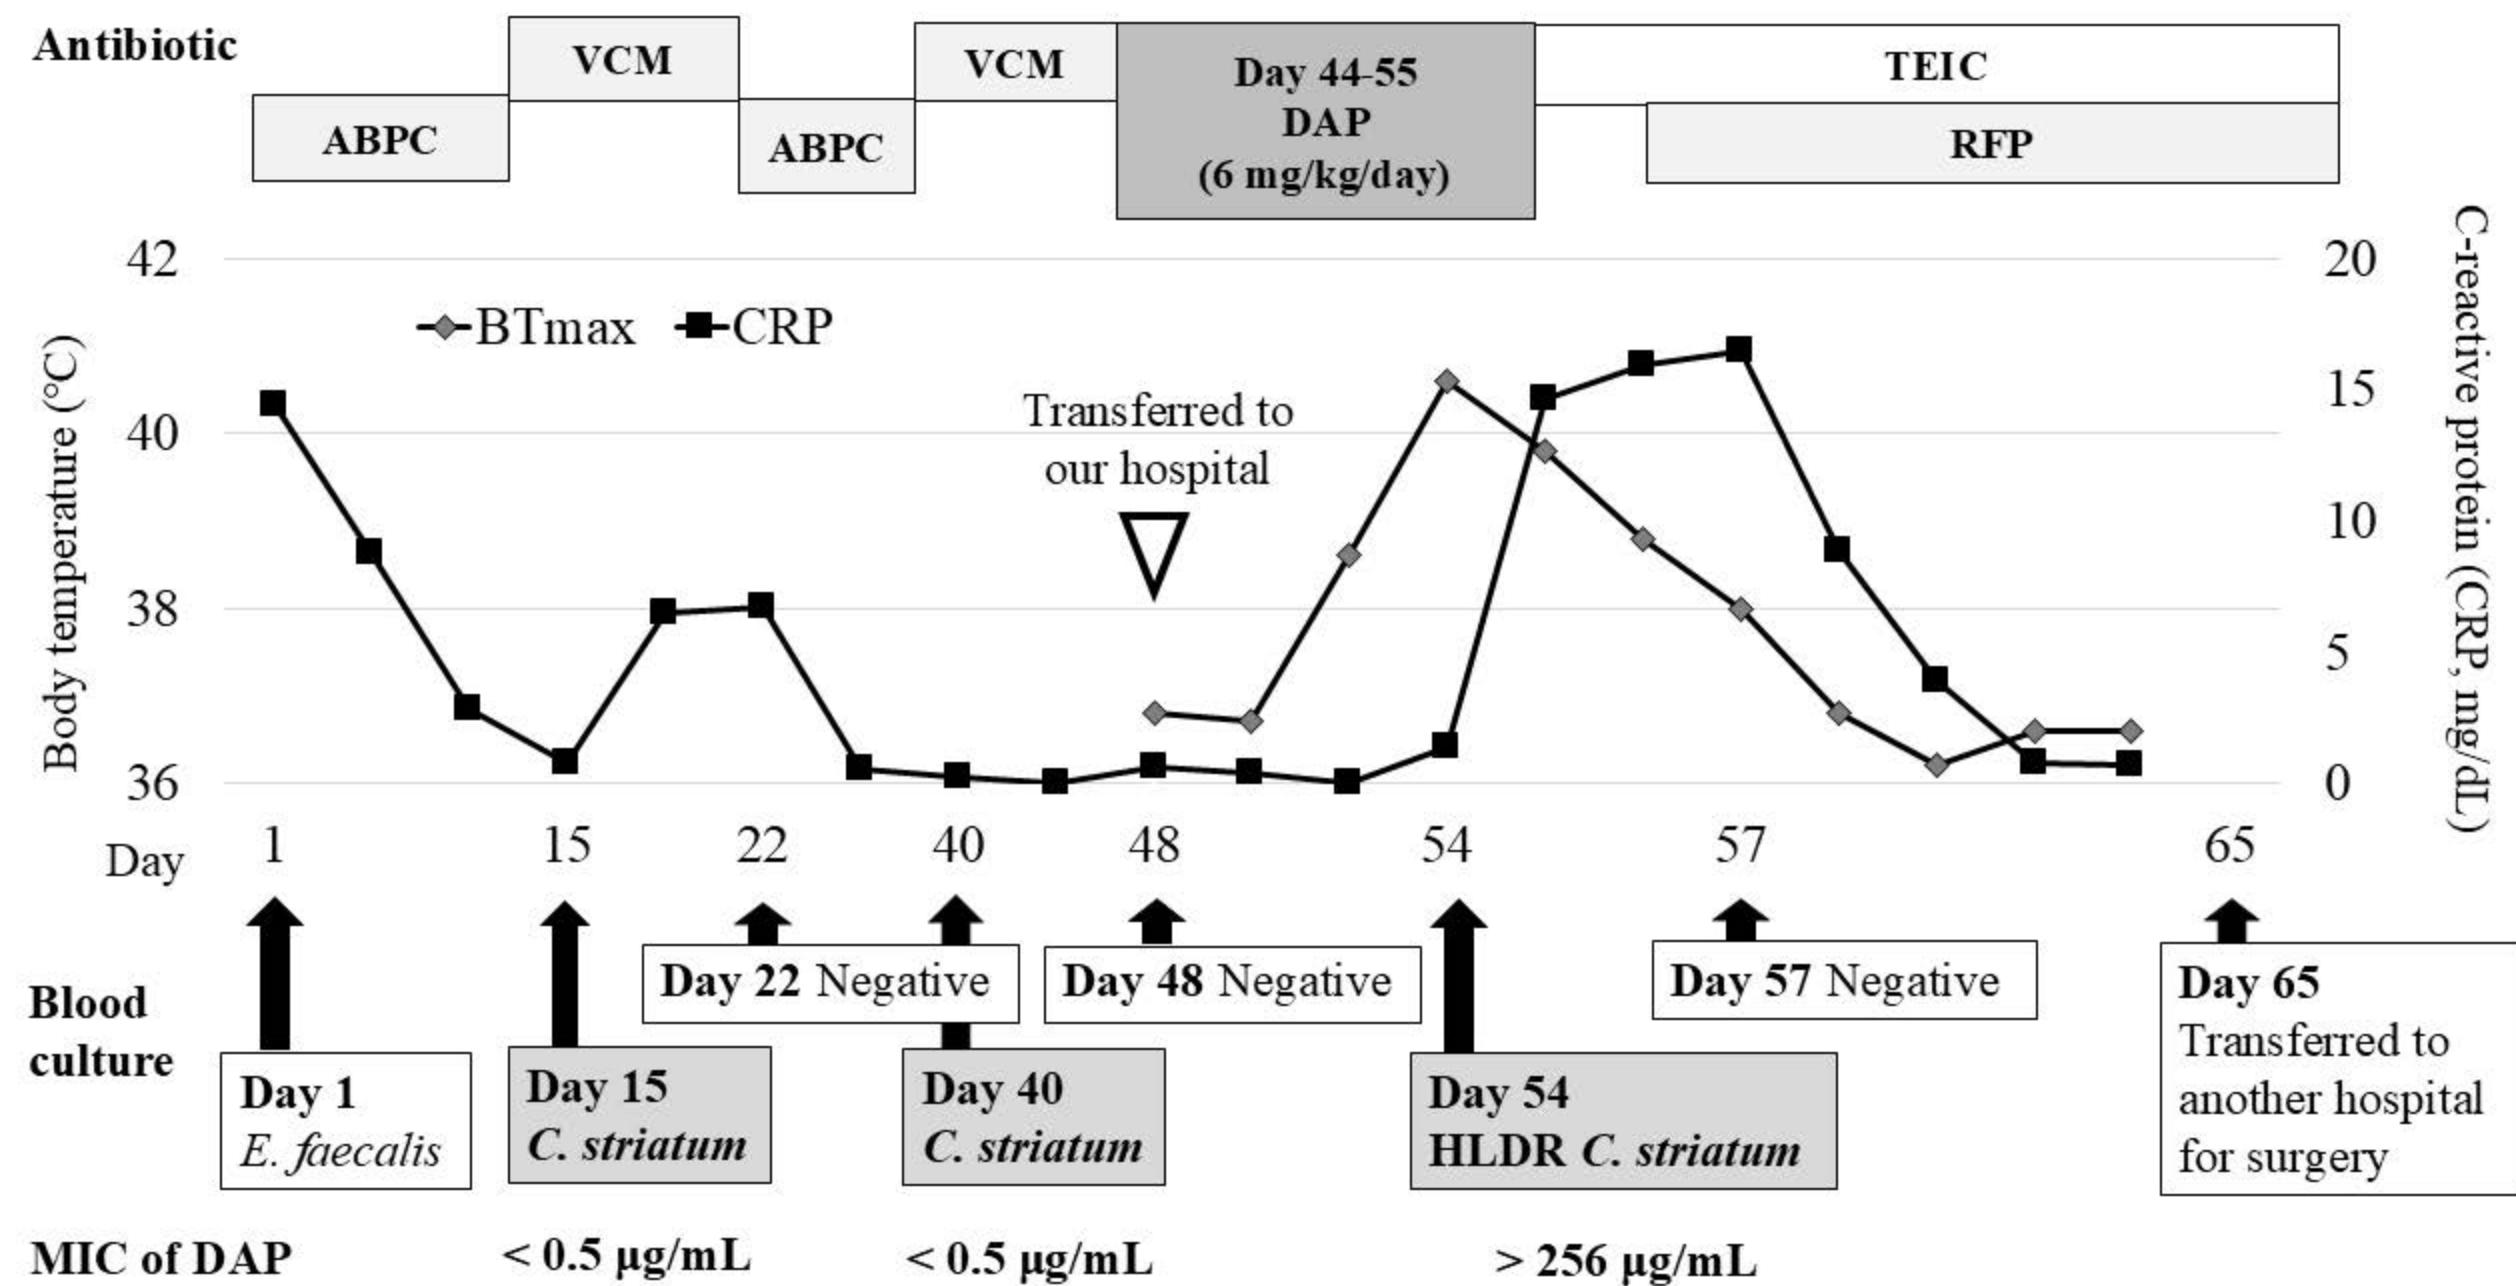

Figure 2. *Corynebacterium striatum* isolates before and after DAP treatment.

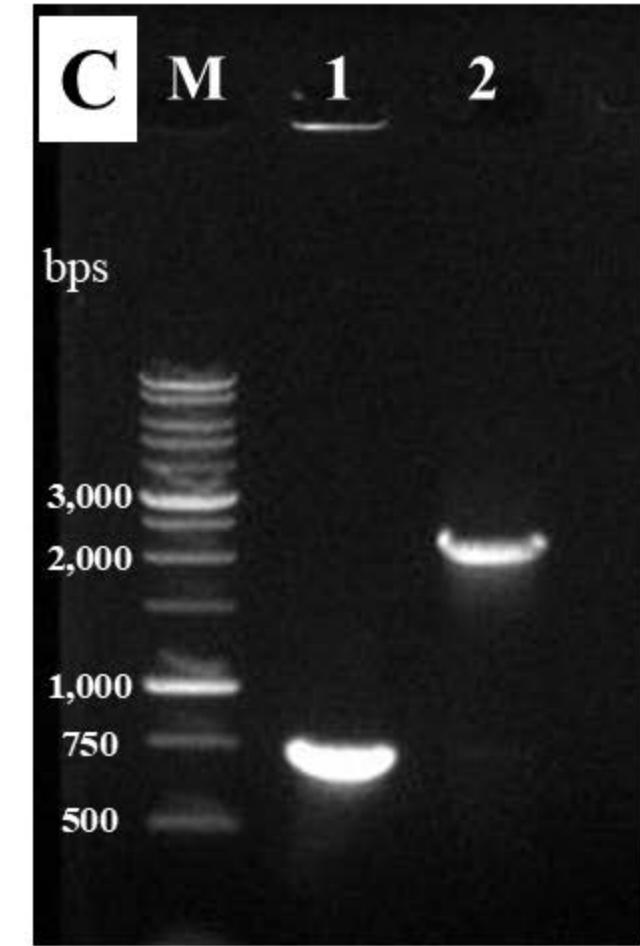

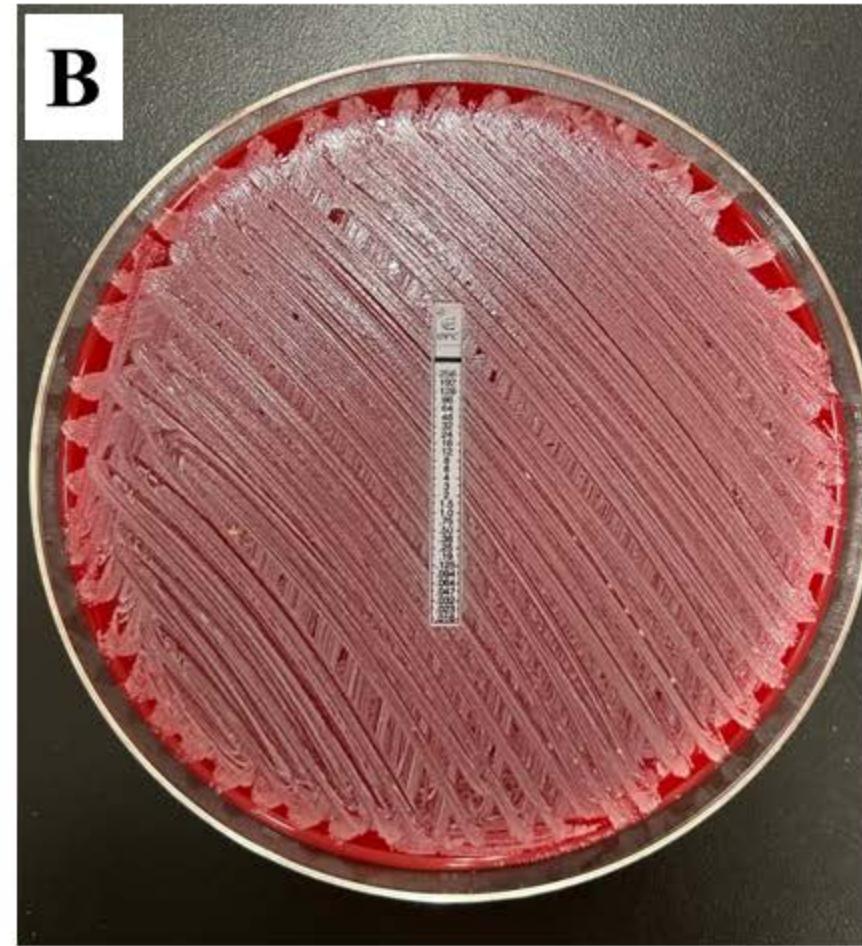

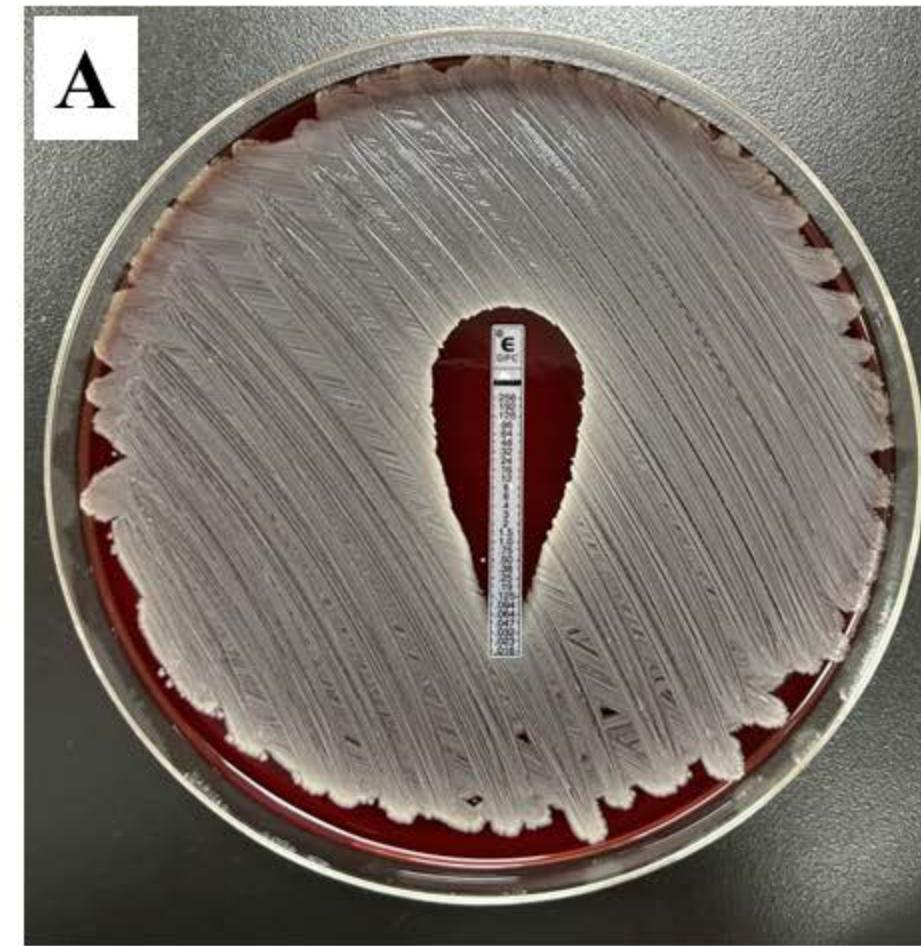

Figure 3. Enrolment flow.

Searching

Article search in MEDLINE and Web of Science databases with the following keywords:
“*Corynebacterium*” AND “Daptomycin” AND “Resistance”

Identification

Identified articles

N = 37 (MEDLINE), N = 43 (Web of Science)

Screening

Additional relevant articles through other sources (N= 1)

Duplicated articles

N = 27

Eligibility check

Articles excluded due to *in vitro* study or clinical articles on unrelated topics

N = 36

Included

Eligible articles in the scoping review

- Clinical cases N= 7 (8 cases)
- *In vitro* research article N= 5

Articles additionally excluded by full-text evaluation on unrelated topics

N = 6
